Preface

This preface contains the following topics:

- About this Guide
- Audience
- Document Conventions

About this Guide

This guide describes how to configure the Kaltura Webcasting software application through Kaltura MediaSpace.

NOTE: Please refer to the official and latest product release notes for last-minute updates. Technical support may be obtained directly from: Kaltura Customer Care.

Contact Us:

Please send your documentation-related comments and feedback or report mistakes to knowledge@kaltura.com. We are committed to improving our documentation and your feedback is important to us.

Audience

This guide is intended for Kaltura MediaSpace or KAF application administrators.

Document Conventions

Kaltura uses the following admonitions:

- Note
- Workflow

NOTE: Identifies important information that contains helpful suggestions.

Workflow: Provides workflow information.

1. Step 1
2. Step 2

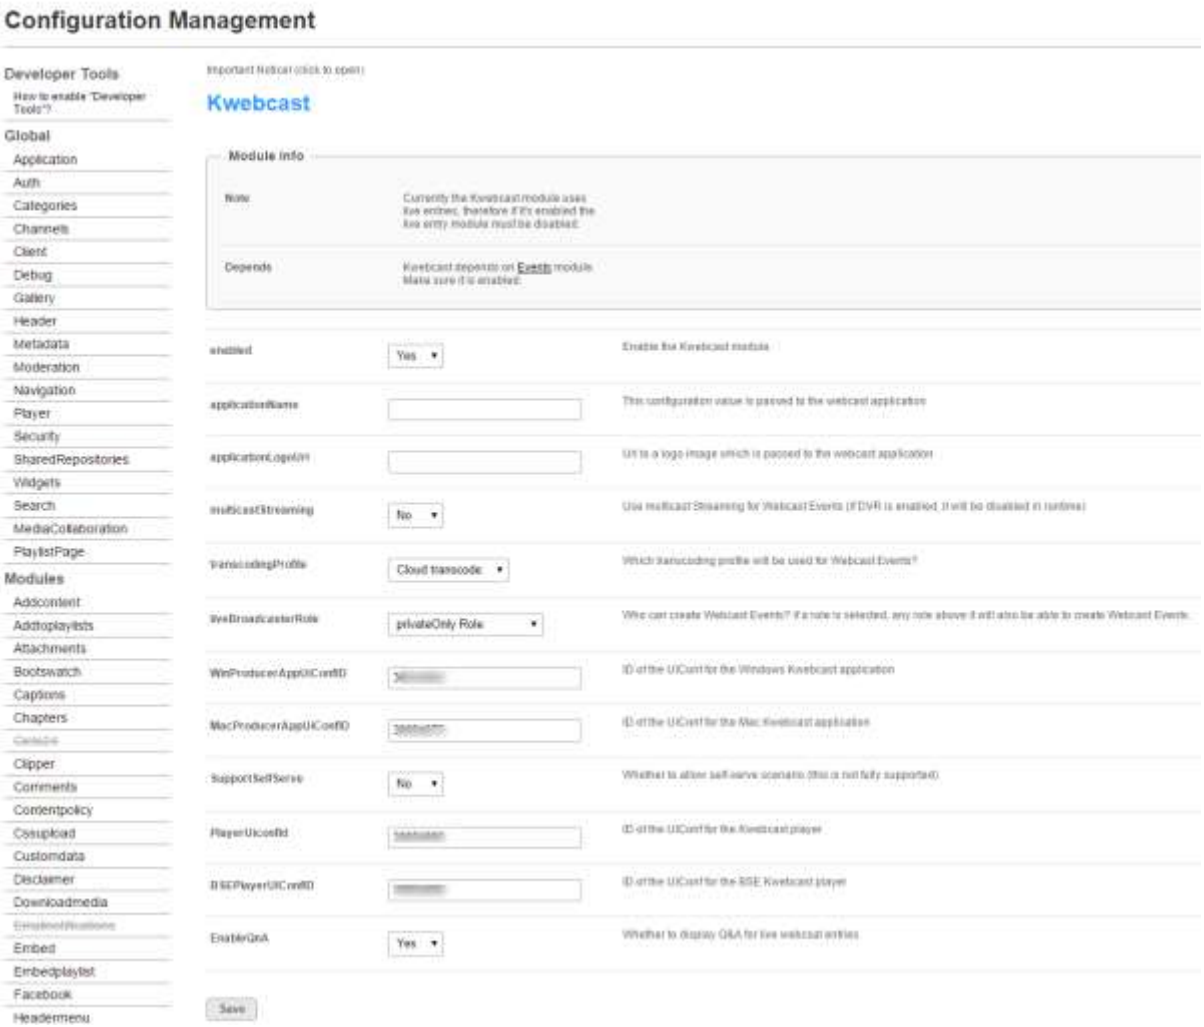
SECTION 1

Activating the Kaltura Webcasting Feature in Kaltura MediaSpace or in your KAF Instance

To configure the Kwebcast module in KMS or in the KAF Admin Console

1. Login to the Kaltura Mediaspace and go to the Kaltura MediaSpace Configuration Management window.
2. Scroll down and select the Kwebcast module in the Modules/Custom/core section List Number.

   The Webcasting Administration page is displayed.
3. In the Enabled field, select Yes to enable the Kwebcast module.



NOTE: Currently the Kwebcast module uses live entries, therefore, if this module is enabled the liveentry module must be disabled.
Kwebcast depends on Events module. Make sure it is enabled.

4. Select or enter values for the following fields and click Save.

Field	Description
enabled	Enable the Kwebcast module.
applicationName	Define the applicationName. This configuration value is passed to the webcast application.
applicationLogoUrl	Define the applicationLogoUrl. Provide the URL to a logo image which is passed to the webcast application.
multicastStreaming	Allow or disallow multicast streaming. Use multicast streaming for Webcast Events (if DVR is enabled, it will be disabled in runtime).
transcodingProfile	Set the transcodingProfile to Passthrough or Cloud transcode for Webcast Events. This is done to choose the live event's transcoding profile based on the partner IDs and according to your required setup. The transcoding profile selected will be applied to all Webcasting events.
liveBroadcasterRole	Limit Webcast Event creation to a certain user or user role. If a role is selected, any role above the role selected will be allowed to create Webcast Events.

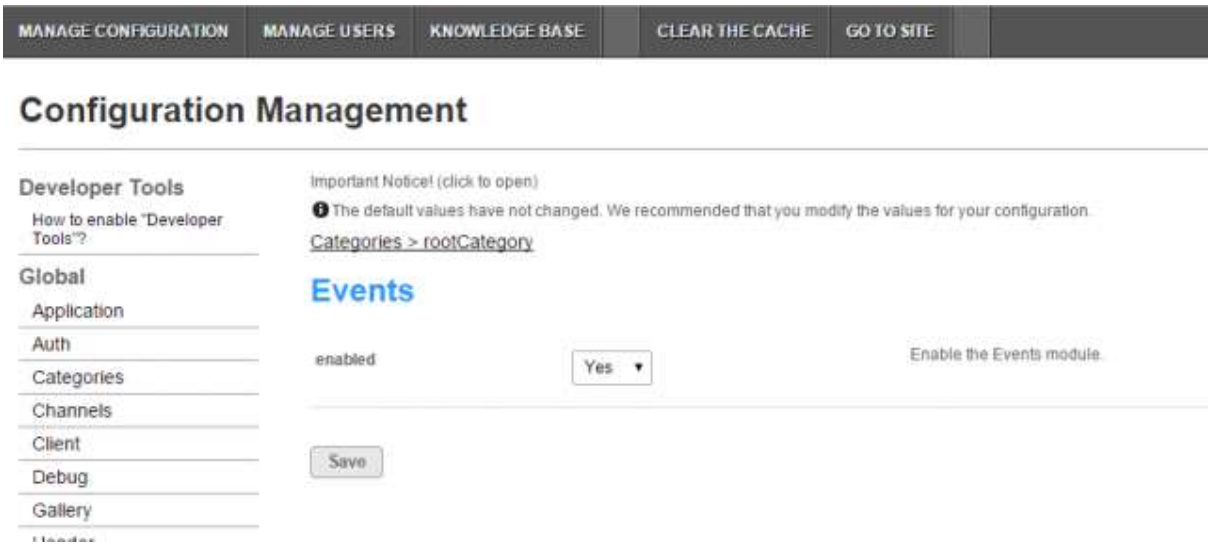
Field	Description
	liveBroadcasterRole: unmoderatedAdmin Rc ▾ Specific Users privateOnly Role admin Role unmoderatedAdmin Role
WinProducerAppUiConfID	This value is automatically assigned by the system upon save. ID of the UIConf for the Windows Kwebcast application
MacProducerAppUiConfID	This value is automatically assigned by the system upon save. ID of the UIConf for the Mac Kwebcast application
SupportSelfServe	Whether to allow self-serve scenario (currently, this feature is not fully supported)
PlayerUiconfId	This value is automatically assigned by the system upon save. ID of the UIConf for the Kwebcast player
BSEPlayerUIConfID	This value is automatically assigned by the system upon save. ID of the UIConf for the BSE Kwebcast player
EnableQnA	Allow or disallow the ability to run QnA sessions during live webcasts.

Configure the Kaltura Events Module in KMS or in your KAF Admin Console

The events module allows you to add the events date for scheduling and timing webcasts.

To configure the Events module in KMS or in the KAF Admin Console

1. Go to the Kaltura MediaSpace Configuration Management window.
2. Select the Events module in the Modules/Custom/core section. To configure the Events module in KMS



3. Select Yes to enable the module.

Field	Description
enabled	Enable the Events module.

4. Click Save.

Verify that you have Activated the Kaltura Webcasting Feature in KMS or in your KAF Instance

Be certain that you have included yourself in the Webcasting permissions to verify that the module is enabled.

To verify that you can create a webcast event

1. Login to Kaltura MediaSpace or your KAF instance
2. Select Add New.
3. Webcast Event should display as one of the Add New options.
