# Preface

## Audience

This guide is primarily intended for Moodle administrators and faculty users. It contains useful information for the main usage flows and functionality of the Kaltura Video Block for Moodle 1.9.

## About this Guide

This guide describes:

- [How to set up the Block](#)
- [How to customize the players](#)
- [How to create Video Resources](#)
- [How to create Video Presentation Resources](#)
- [How to create and grade Video Assignments](#)

# Overview of the Kaltura Video Block for Moodle

Kaltura's Video Block for Moodle makes it easy to add the robust capabilities of Kaltura's open source online video platform to any Moodle site. The module was developed specifically for Moodle, and easily integrates with other features and modules, such as resources and assignments.

The module allows Teachers and Admins to create 2 new resources and 1 assignment type:

- Video Resource: Easily add video content to your course.
- Video Presentation resource: Create a synchronized view of a Document and a Video.
- Video Assignment: Allows students to submit videos.

# Configuring the Kaltura Video Block for Moodle

Only site administrators can configure various settings of the Kaltura Block.

## Setting Up the Kaltura Video Block for Moodle

After you install the Kaltura Video Block, you will need to configure the block settings. For installation, please refer to the [Installation Guide](#).

### To set up the block

1. Go to Site administration > Modules > Blocks > Kaltura Video Extension  
The Kaltura Video Extension page is displayed,

#### Kaltura Video Extension

This page allows you to configure the front page and name of this new site. You can come back here later to change these settings any time using the Administration menus.

Connect status

Successfully connected to your hosted account

Kaltura hosted and CE settings

Input the the type of connection you would like to use (KalturaCE or the hosted Kaltura server) and enter in the credentials related to the connection you are using.

Connection Server

kaltura\_conn\_server

Kaltura hosted solution

Default: Kaltura hosted solution

Select whether you are connecting to a hosted account on whether you are connect to your own Kaltura CE server

Server URI

kaltura\_uri

http://www.kaltura.com/

Default: http://www.kaltura.com/

Type in the server URI you want to connect to. Otherwise just type in the default settings

Hosted account login

kaltura\_login

user.name@email.com

Default: kaltura\_hosted@email.com

Login username that is used to log into the Kaltura site

Hosted account password

kaltura\_password

.....

☐ Unmask

Password that is used to log into the Kaltura site

Figure 1 - Connecting to Kaltura

2. Set the connection to Kaltura.
  - a. Select your Kaltura server (default is Kaltura SaaS)
  - b. Enter your Kaltura partner login credentials.If you do not have a Kaltura account, signup [here](#) to obtain one.

### Register for a Free Trial of Kaltura's Video Package for Moodle

The best way to experience Kaltura's Video Package for Moodle is with a hands-on free trial.

Fill in the following form, then download the extension file, and follow the steps to install and activate the extension within your Moodle installation.

**NOTE: if you already have a Kaltura account, please click [here](#).**

* First Name	<input type="text"/>
* Last Name	<input type="text"/>
* E-Mail	<input type="text"/>
* Phone	<input type="text"/>
* Institution	<input type="text"/>
Website	<input type="text"/>
* Job Title	<input type="text"/>
* Country	- Select -
* Number of Fully Enrolled Students	- Select -
* Would you like a Kaltura Video Expert to contact you?	- Select -
How do you plan to use Kaltura's video platform?	<input type="text"/>

Please answer this simple math problem to confirm that you're human (and not an evil spam-bot).

\* Math question     $3 + 0 =$    

\* Solve this simple math problem and enter the result. E.g. for 1+3, enter 4.

### Thank you for registering!

If you have not yet downloaded and installed the Extension, please download it here:

- [Download the Kaltura Video Block for Moodle 1.9](#) - package includes extension files, installation guide and release notes
- [Download the Kaltura Video Package for Moodle 2.x](#) - package includes extension files, installation guide and release notes

Once you have installed the extension, follow the instructions in the Installation Guide in order to activate it and get started.

## Customizing Players

Kaltura's most commonly used widgets include the Kaltura Dynamic Player (KDP) and the Kaltura Uploader. The Kaltura UIConf ID is the unique identifier for Kaltura widgets. It is recommended to use the default widgets for the Kaltura Video Block.

Players can be created, designed and configured with specific features and buttons within the Studio tab, in the Kaltura Management Console. For instructions on how to create, design and configure a player, refer to the [KMC User Manual](#).

After you create a player, you can select it in the Kaltura Block Configuration page to replace the default players.

You can also modify the uploader widgets (also known as the Kaltura Contribution Wizard - KCW) and

## Creating Video Resources

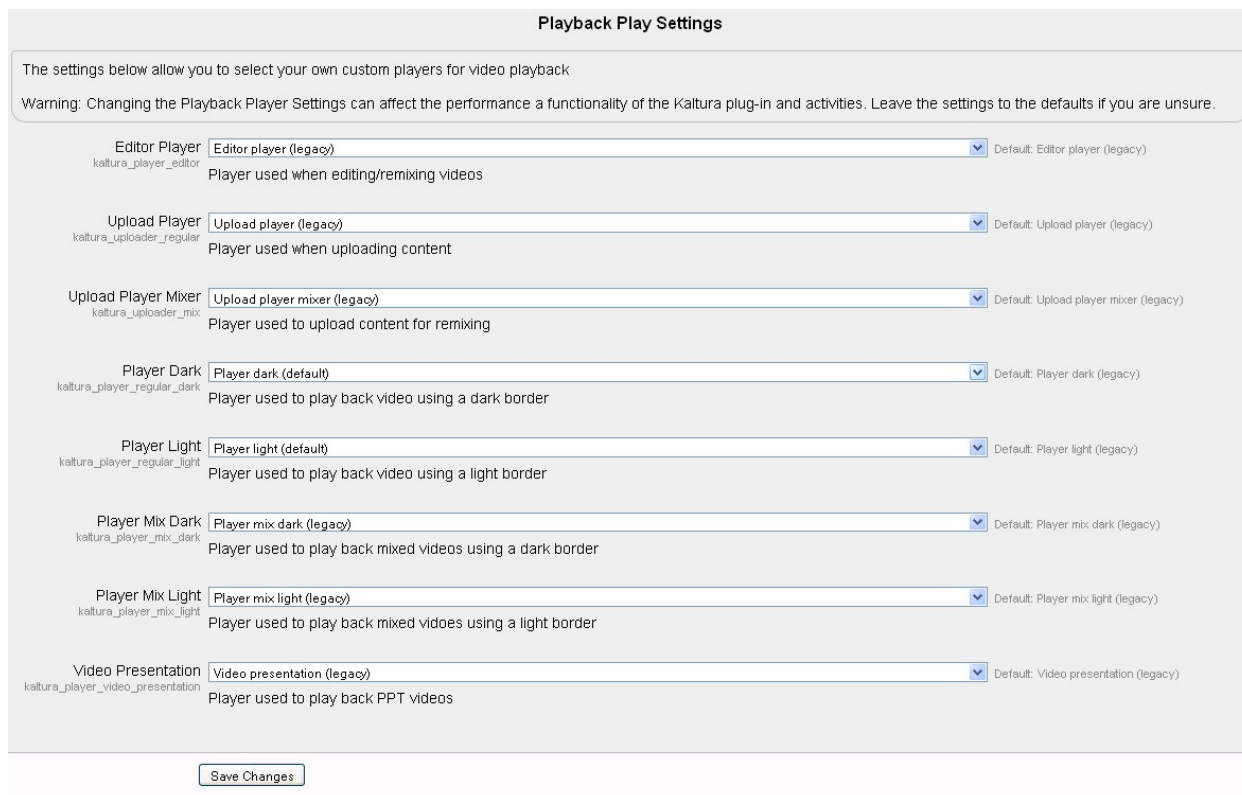

Kaltura Presentation Widget, using the Kaltura APIs. Please contact Kaltura for more information on using the Kaltura API or refer to the [Kaltura API Documentation](#).

**NOTE:** The default widget settings should work out of the box when working with Kaltura SaaS

### To customize the widgets

1. Go to Site administration > Modules > Blocks > Kaltura Video Extension

**Playback Play Settings**

The settings below allow you to select your own custom players for video playback

Warning: Changing the Playback Player Settings can affect the performance a functionality of the Kaltura plug-in and activities. Leave the settings to the defaults if you are unsure.

Editor Player <small>kaltura_player_editor</small>	Editor player (legacy) Player used when editing/remixing videos	Default: Editor player (legacy)
Upload Player <small>kaltura_uploader_regular</small>	Upload player (legacy) Player used when uploading content	Default: Upload player (legacy)
Upload Player Mixer <small>kaltura_uploader_mix</small>	Upload player mixer (legacy) Player used to upload content for remixing	Default: Upload player mixer (legacy)
Player Dark <small>kaltura_player_regular_dark</small>	Player dark (default) Player used to play back video using a dark border	Default: Player dark (legacy)
Player Light <small>kaltura_player_regular_light</small>	Player light (default) Player used to play back video using a light border	Default: Player light (legacy)
Player Mix Dark <small>kaltura_player_mix_dark</small>	Player mix dark (legacy) Player used to play back mixed videos using a dark border	Default: Player mix dark (legacy)
Player Mix Light <small>kaltura_player_mix_light</small>	Player mix light (legacy) Player used to play back mixed vidoes using a light border	Default: Player mix light (legacy)
Video Presentation <small>kaltura_player_video_presentation</small>	Video presentation (legacy) Player used to play back PPT videos	Default: Video presentation (legacy)

Save Changes

Figure 3 - Configuring players

2. Changing the player configured in “Player Dark” dropdown will change the players used when choosing Player Dark for Video Resources
3. Changing the player configured in “Player Light” dropdown will change the players used when viewing video assignments and when choosing Player Light for Video Resources
4. The rest of the options are for advanced configuration and it is recommended to leave them as is.

## Creating Video Resources

Teachers and administrators can create video resources that will be displayed inline within a course.

### To create a Video Resource

1. Select “Video” from the “Add a resource...” dropdown in the relevant part of the course you want the resource to appear in.

## Creating Video Resources

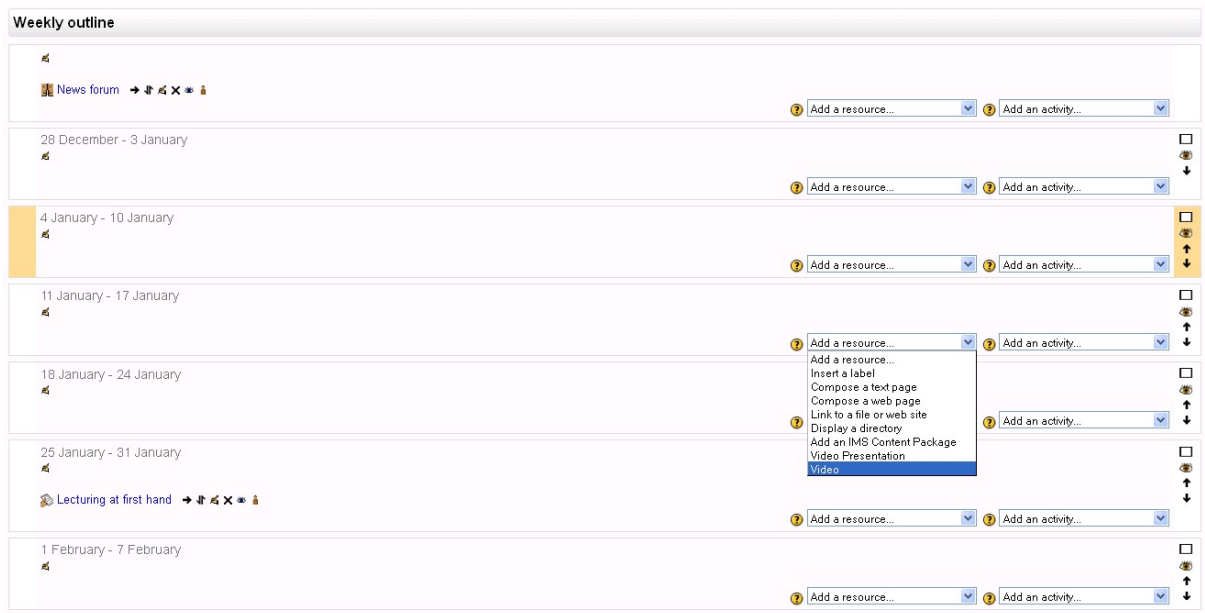

Figure 4 – Creating a Video Resource

2. Select the Video Resource's name and summary.

Figure 5 - Video Resource Creation Page

3. Press "Add Video" to launch the uploader widget and then follow the steps to upload your file.

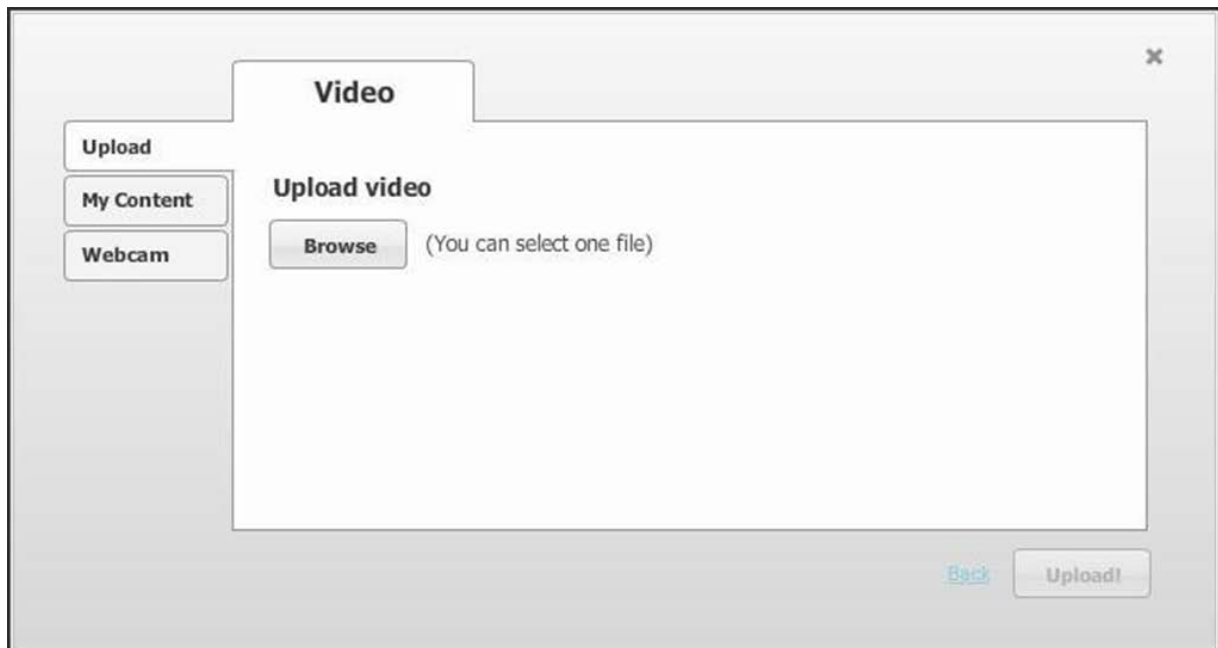

Figure 6 - Kaltura Uploader

4. After the video is added, select the player design to use to view this video, and select the player's dimensions and size and click OK.

Figure 7 - Player properties

5. You can replace the video by pressing the “Add Video” button in the Video Resource Creation page.
6. When finished, press “Save and display” or “Save and return to course” to save the video resource and make it available for course participants.

# Creating Video Presentation Resources

The Video Presentation Resource creates a synchronized view of a video aside a document, with key points that can be edited by the author.

## To create a Video Presentation Resource

1. Select “Video Presentation” from the “Add a resource...” dropdown in the relevant part of the course you want the resource to appear in.
2. Enter the Video Presentation’s Name and Summary.
3. Press “Select Video” to launch the uploader widget and follow the upload flow.
4. Press “Upload document” to upload the document to be synchronized with the video.  
Supported documents include \*.ppt; \*.doc; \*.xls; \*.ods; \*.odt; \*.odp; \*.pptx; \*.docx; \*.pdf; \*.xlsx

Sync Keypoints

Figure 8 - Uploading material for a Video Presentation Resource

5. Wait until both assets have finished converting:
  - a) You can check the status of the video conversion process by pressing “Click here” in the video area
  - b) You can check the status of the document conversion process by pressing “Click here”
6. Once both video and document are ready, click “Sync Keypoints” to synchronize the document pages with the timeline of the video.

### Creating together presentation

The open source video project "Big Buck Bunny" as an example for collaborative creativity.

big buck bunny short HD.flv

Figure 9 - Syncing the video and the presentation times

7. On the presentation widget, you can sync slides to key-points in the video using the Presentation Widget controls. Simply play the video or drag the video scrubber to the selected place for the selected slide/page within the document, and click 'Sync Video/Slide'.
8. Save when you are done.  
As students play the presentation, the video plays while the slides automatically rotate in full synchronization, based on the key-points set by the presenter. Students can easily navigate through the slides with 'forward' and 'back' buttons, or by clicking on a specific slide thumbnail.

## Creating and Grading Video Assignments

Teachers can create a Kaltura Video Assignment that requires students to submit Videos as assignments. Following submissions, teachers can view the submitted videos, provide feedback and grade the video assignments.

### To create a Video Assignment (teacher)

1. Select "Video" under "Assignments" from the "Add an activity..." dropdown in the relevant part of the course you want the activity to appear in.
