# Introduction

These release notes pertain to Kaltura MediaSpace, released on March 14, 2012

These release notes are intended for developers and administrators of institutions using Kaltura MediaSpace.

## Purpose and Scope

The purpose of this document is to provide an overview of the new features developed, and the known issues for this release.

## What's New in this Release?

Kaltura MediaSpace version 3.0 includes the following new features:

Feature	Description
Entry page	Each media item has a dedicated page allowing you to linking data directly to media.
Edit Entry page	Each media item has a dedicated edit page where you can edit entry information.
New Upload Media flow	The Upload process is now contained in a separate page. You can continue browsing and enter media metadata during the upload.
New Record from Webcam Flow	The Record from Webcam is now in separate page.
New Create Video Presentation flow	The Create Video Presentation flow uses a new enhanced widget.
Publish module	The Publish module now allows authorized users to publish media to a site from anywhere that the media appears.
Support for https	Support has been added for https.
Restrict publishing	Publishing is now restricted until the required metadata fields are filled in.
New My Media page	The New My Media page has been optimized for viewing and editing large collections of user's media.

## Known Issues and Limitations

Issue	Description
Android support	This version of Kaltura MediaSpace does not support Android devices.
Restricted category – Permission Role must be selected.	To restrict a category, you must select a permissioned role. Otherwise the category will not be restricted.

Issue	Description
Webcam Recording – Multiple recording windows.	Multiple recording windows are not supported. You can record one entry from webcam at a time.
Webcam Recording – Initialization time	Webcam initialization might take a few seconds
External and Internal Webcam Use	Switching between an external and internal camera is not supported.
Webcam record description	Description of recording will only be saved after the record was saved.
Video Presentation display	The Video Presentation is not presented under All Media tab. It is displayed under the filtered video presentation. .
Video Presentation player – Volume button is missing	The Volume button in the video presentation player is not functional. Expected fix in the next release of the KDP.
Video presentation – Document support	Only A4 documents are supported in the Video Presentation. Other formats might be truncated.
IPAD, Category view – media does not load	On the category view, only the first loaded media in the category can be played.
Media's search through custom metadata	Search by custom metadata is not supported.
My Media link	If the My Media link is configured to display in the header, the My Media link will appear for all roles, including view only.
Description length	The maximum allowed length for the description is 430 characters.
Multiple selection	Multiple selections do not support paging.
Max file upload size	There is no message displayed to users if they exceed the maximum supported file uploading size (2gb).
Oembed code	The Oembed code works only when Anonymous is set to true.
