Contents

Introduction

These release notes pertain to the Kaltura Video Package for Moodle 2.x, released on January 4th 2012.

These release notes are intended for administrators of institutions installing the Kaltura Video Package on Moodle 2.x (2.0, 2.1, 2.2) and for Kaltura internal use.

Purpose and Scope

The purpose of this document is to provide an overview of the new features developed and the known issues for this release.

What's New in this Release?

The Kaltura Video Package for Moodle 2.x enhances the Moodle framework with fully integrated video capabilities.

Key features of the Kaltura Video Package for Moodle 2.x:

- **Video Resource** – teachers can add a video resource to their Moodle courses.
- **Video Assignments** - teachers can assign video assignments to students. Each student can complete the assignment by uploading video content. Video assignments can then be graded by teachers within Moodle.
- **Video Presentation Resource** – teachers can synchronize a video and a document (such as a PowerPoint presentation) to create a video presentation. Students can play the presentation, so that the video plays while the slides automatically rotate in full synchronization, based on the key-points set by the presenter.
- **Administrator Tools** - have been enhanced with the following features. You can:
  - Enable mobile delivery (in Moodle UI)
  - Customize players (in Moodle UI)
  - Set specific permissions for videos (in KMC)
- **Advanced integration** features with Moodle have been added such as:
  - Proxy support
  - Backup and Restore
  - Integration with Moodle grade administration

Known Issues and Limitations

Subject	Description
Video Resource Player properties	The Name field in Player properties is limited to 100 characters.
Edit & Remixes	When migrating from Kaltura Video Block for Moodle 1.9, editable videos are playable but cannot be re-edited.

Subject	Description
Mobile	Video Presentation is not supported in HTML5.
Mobile	The Toggle full screen tooltip does not disappear automatically in Android based devices.
Mobile	When viewing the grade list of a Video Assignment via mobile devices, and enabling quick grading, the two right columns (Status and Grade) are cut from the table.

NOTE: If you are performing an upgrade from the Kaltura Video Block v1.5 for Moodle 1.9, please contact moodle-upgrade@kaltura.com to complete the upgrade process successfully.
